# Ruby Monstas

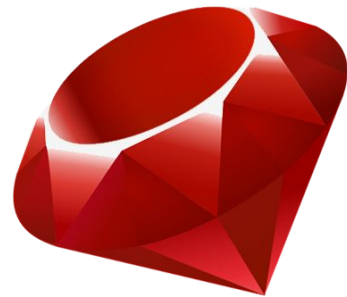

---

## Welcome Slides

---

---

# Welcome

---

## General Intro

---

# General Information

---

- Course Schedule
  - Procedure (lecture & exercises)
  - Please ask questions :)
-

# Who are we coaches?

---

# Who are you?

---

- What's your **name**?
  - What do you do?
  - What's your **motivation** to learn Ruby?
-

# What is it?

---

- Introductory **Ruby** course for women
  - We want to **bring more women to tech**
  - We want to **motivate you** to learn to code
  - We want that you **have fun** learning to code
-

# What is it not?

---

- Ruby on Rails, web programming course
  - Official certified™ Ruby® programmer
-

---

# Learning To Program

---

Some recommendations

---

# Learning to program

---

- Everybody learns differently: reading books, programming by themselves, exercises
-

# ...but we think this might help

---

- Write your own notes
  - Focus when you learn
  - Find challenging problems
  - Try make your own small projects
-

# Learning to program

---

- Formatting your code
  - Error messages are your friends
  - Use Google, add “ruby”, [stackoverflow.com](https://stackoverflow.com)
  - Chunk the problems - always start with small steps
-

---

# Installation Session

---

Install Ruby

---

# Installing Ruby

For **Windows**: [rubyinstaller.org/downloads/](https://rubyinstaller.org/downloads/)

The screenshot shows the 'Downloads' section of the RubyInstaller.org website. It features a light blue header with the word 'Downloads'. Below it, there are two tabs: 'RubyInstallers' (active) and 'Archives»'. A note says: 'Not sure what version to download? Please read the right column for recommendations.' Under the 'WITH DEVKIT' section, there is a list of download links, each preceded by a small icon of a computer monitor. The links are: 'Ruby+Devkit 2.6.1-1 (x64)', 'Ruby+Devkit 2.6.1-1 (x86)', 'Ruby+Devkit 2.5.3-1 (x64)' (highlighted with a red arrow), 'Ruby+Devkit 2.5.3-1 (x86)', 'Ruby+Devkit 2.4.5-1 (x64)', and 'Ruby+Devkit 2.4.5-1 (x86)'. Below this list, there is a pink rectangular button labeled 'WITHOUT DEVKIT'. Under this button, there are two more download links: 'Ruby 2.6.1-1 (x64)' and 'Ruby 2.6.1-1 (x86)'. To the right of the download list, there is a section titled 'WHICH' with text that is partially cut off: 'If you c', 'Ruby, i', 'provide', 'Devkit', 'immed', 'bit nati'. Below this, there is a section titled 'HOW 1' with text that is also partially cut off: 'Ruby c', 'by runn', 'and wil', 'use the', 'can be'.

**Downloads**

**RubyInstallers** **Archives»**

Not sure what version to download? Please read the right column for recommendations.

**WITH DEVKIT**

- Ruby+Devkit 2.6.1-1 (x64)
- Ruby+Devkit 2.6.1-1 (x86)
- Ruby+Devkit 2.5.3-1 (x64)**
- Ruby+Devkit 2.5.3-1 (x86)
- Ruby+Devkit 2.4.5-1 (x64)
- Ruby+Devkit 2.4.5-1 (x86)

**WITHOUT DEVKIT**

- Ruby 2.6.1-1 (x64)
- Ruby 2.6.1-1 (x86)

**WHICH**

If you c  
Ruby, i  
provide  
Devkit  
immed  
bit nati

**HOW 1**

Ruby c  
by runn  
and wil  
use the  
can be

Take the latest  
“without devkit”  
version with (x64,  
which means 64 bit)

# Installing Ruby

---

For **Mac**: It's already installed. Open “Terminal” and enter `ruby -v`

A screenshot of a macOS Terminal window. The title bar at the top shows standard window controls (red, yellow, green buttons) and the text 'chaupt -- bash -- 80x24'. The terminal content shows the last login time as 'Sun Jul 12 21:14:59 on ttys001' and the current prompt as 'Christophers-MacBook-Pro:~ chaupth\$'. A cursor is visible at the end of the prompt line.

```
chaupt -- bash -- 80x24
Last login: Sun Jul 12 21:14:59 on ttys001
Christophers-MacBook-Pro:~ chaupth$
```
